

## **compound (20)**

is any substance made of 2+ **kinds** of atoms

## **element (21)**

a substance that cannot be broken down by either chemical reactions or physical changes

## **science idea (22)**

most of the 90 natural elements are metals

## **3 properties of metals (23)**

-stretch & bend/don't break when hit

-shiny surfaces when rubbed or scratched

-conducts heat & electricity

## **human body (24)**

Top 6 elements are

oxygen, carbon, hydrogen,

nitrogen, calcium, phosphorus

## **chemistry of Earth (25)**

Iron, oxygen, magnesium, silicon
